

# Stainless steel horizontal single stage centrifugal pump (200 m3)

*Stainless steel horizontal single centrifugal pump is made by advanced techniques such as pressing bulging welding of corrosion resistant plate. It is a new generation centrifugal pump initiated in China and may replace traditional IS pump and common corrosion proof pump. It features beautiful appearance , light and handy structure, high efficiency and energy saving, durable, corrosion proof, low noise, etc*

Stainless steel horizontal single stage centrifugal pump (200 m3)	
Maximum Capacity	Up to 200 m3/h
Maximum Head	Up to 70 m
Maximum temperature	Up to 100°C
Power Supply	Up to
Material Design	<ul style="list-style-type: none"><li>• 304 Stainless steel</li></ul>
Pump Size	On request
